

# Health

#### Did you know?

When you feel sick, antibiotics are not always the answer. Antibiotics kill bacteria. Viruses cause colds and the flu. Antibiotics do not help with viruses.

## Be flu free

Get your flu vaccine soon.

The best way to prevent the flu is to get vaccinated. Everyone 6 months of age and older should get a flu shot every fall. Following these tips can also help prevent the flu:

- Wash your hands often with soap and water. Or, use an alcohol-based hand sanitizer.
- Don't touch your eyes, nose, or mouth unless you have just washed your hands.
- Eat well, exercise, drink lots of water, and get enough sleep.

Your best shot. There is no cost to you for flu shots. The best place to get one is at your primary care provider's (PCP) office. You can also get one at any clinic

or store that accepts your plan. Visit myuhc.com/CommunityPlan or use the **Health4Me** app to find a location near you.

## You can quit

#### Join the Great American Smokeout.

Tobacco use is the largest preventable cause of disease and early death. Nearly 42 million people in the United States smoke. Are you one of them?

Quitting smoking is not easy. It's a physical and mental addiction. Medicine and support can help. Pick a date and make a plan. The Great American Smokeout is a good day to quit — even if it's only for one day. This year's date is Nov. 17.

**You can do it.** Talk to your primary care provider (PCP) about quitting.

You can also call the KanQuit Line toll-free at **1-800-QUITNOW** (1-800-784-8669) for free help. Visit cancer.org/smokeout for more resources.

#### Get results

UnitedHealthcare Community Plan has a Quality Improvement program. It works to give our members better care and services. Each year we report how well we are providing health care services to our members.

Last year one of our goals was to increase the number of eye exams, HbA1c, and kidney function tests that our diabetic members have. We found that more of our diabetic members had these tests done. This year our goal for our diabetic members is not just more tests, but better test results.

Another one of our goals was to increase the number of women who saw their doctor 3–8 weeks after having a baby. We found that more of our patients had these visits. This year we will focus on helping pregnant women start seeing their providers early and going throughout their pregnancy.

In the coming year, we want to increase the number of members who have dental checkups. Plus, we want to make sure more children have yearly checkups.

We also do member surveys each year. They show how well we are meeting our members' needs. Our 2016 surveys showed overall improvement in how our members rated their health care. This year we will work on improving satisfaction. We will improve the materials and information that we provide. Our goal is for members to better understand their health plan benefits.

**Get it all.** Want to know more about our Quality Improvement program? Call Member Services or visit **myuhc.com/CommunityPlan**.

#### Know the risks

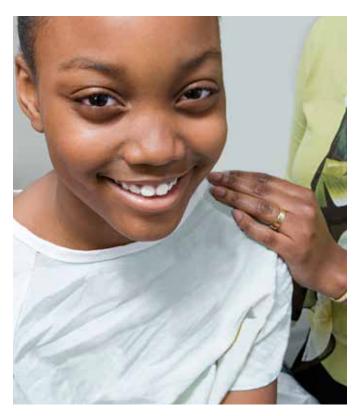

Breast cancer is the second most common form of cancer among women. There are many risk factors for breast cancer. Most of them are out of your control, like family history. But some relate to your lifestyle. You can reduce your risk of breast cancer by keeping a healthy weight and exercising. Limiting how much alcohol you drink may also help.

It is important for most women 40 and over to get a mammogram every two years. This breast X-ray can detect breast cancer at an early stage. Breast cancer can be cured most of the time if it is caught early.

Talk to your doctor about your breast cancer risk. Your doctor may suggest a different screening schedule for you. Some women should start screening earlier or get different tests. Others need mammograms less often.

Know your benefits. Do you have questions about your benefits for breast cancer detection and treatment? See your Member Handbook or call Member Services.

## **Teen time**

## Checkups are important at adolescence.

Checkups help keep kids healthy at any age. Even preteens and teenagers should see the doctor for a well visit each year. These visits make sure your child is maturing well. Your child's body mass index (BMI) will be measured. BMI uses height and weight to see if your child weighs too much or too little.

The doctor and your child can discuss risky behaviors. These include substance abuse and safety. Sexual health will also be discussed. Plus, your child will get any shots or tests he or she needs.

When the preteen years start, it's time for another round of shots. Tdap, HPV, and meningococcal vaccines are recommended for most 11- to 12-year-olds. In addition, teens need a booster of the meningococcal vaccine at age 16.

**Get guidance.** Preventive guidelines are available. This document says what tests and shots are needed and when. Visit **myuhc.com/CommunityPlan** or call toll-free **1-877-542-9238 (TTY 711)** to get a copy.

### Growing up

Teenagers can start learning to be health care consumers. Becoming involved with their own care can help teens build self-esteem and become more independent. Parents can teach their teens health care skills such as:

- making medical and dental appointments
- writing a list of questions to ask at appointments
- talking with the provider
- filling out forms
- understanding medications

Teens have different health care needs than children. Your teen may be ready to switch from a pediatrician to a primary care provider who treats adults. Your daughter may need a woman's health provider such as an OB/GYN.

**We can help.** UnitedHealthcare Community Plan can help your teen choose the right provider. Call Member Services, visit **myuhc.com/CommunityPlan** or use the **Health4Me** app.

Member Services Find a doctor, ask benefit questions, or voice a complaint, in any language (toll-free).

## Call us

We're here for you.

We are always working to make your experience with UnitedHealthcare Community Plan the best it can be.

Call one of our member advocates when you have a question or need help with your health plan. A member advocate can help you:

- find a primary care provider (PCP) and schedule an appointment
- get answers about your benefits
- enroll in the Community Rewards program so you get rewarded for managing your health
- ensure you get the most out of your plan

Give us a call. Our toll-free number remains the same. Call 1-877-542-9238 (TTY 711). We're here for you.

#### The waiting game

When you call to make an appointment with a provider, tell the office why you need to be seen. You should be able to get appointments in the following timeframes:

- Emergency: immediate
- Urgent PCP visit: same day
- Routine PCP visit: within 14 days
- Specialist visit: within 30 days of referral
- Post-hospital discharge visit: within 7 days

Not sure? NurseLine can help you decide the best place to get care. Nurses can also help you with self-care. NurseLine is available 24/7 at 1-855-575-0136 (TTY 711).
